for the task. Should the Census be taken in the several wards at the same time too great a number of men would have to be drawn from the force. But there seems no reeson why the work would not be clone expedit onely enough if the wards were gone through in succession.

The primary point is that a new census be taken, and the sooner the better. Tois second attempt should be a thorough smeess and apartment-houses with two hundred inmates should not be serenely passed over by the census-takers. The first census was so poor a one that the population of this town still remains a pure conjecture.

Should They Be Younger or of Equal Years with Their Spouses.

An Important Factor in Matrimonial Happiness.

Latest Literary Contest Opened in the Columns of "The Evening World,"

Should husband and wife be near the same age, or should the

Speculation arises then as to the degree in which their mutual happiness would be enlarged or decreased if there had been a disparity of rears in the wife's favor.

Every one knows a husband who is everal years the senior of his wife. Every one knows too married pairs whose pirthdays come near together. Which class of couples is the happier, and to what extent, if any, is the joy and har mony of their weaded life affected by the difference in years?

The advice of domestic veterans to the matrimonially melined varies. " Do not marry a woman of your own age," "Do self "-these are words which drop from the fips of interested or disin erested oracles, just as the experience or observation of the speaker may bias his or her opinion.

It is probable that every reader of THE EVENING WORLD has had the question at the head of this article presented directly or indirectly through experience observation or report.

It may not have come definitely o strongly enough to have caused an opin ion to form or to change; but it must have brought thoughts and theories enough to go towards such ends.

Of these thoughts and theories, and of opinions backed up by arguments, Tru Eventua Would invites a collection, to be entered as the material in what should be an interesting contest.

In communications limited to 200 words ward their views upon this question of

The contest will be under the same general regulations as those of its similar predecessors. It is opened at once with the publication of this notice, and the date for its close will be announced sufficiently in advance.

Selected communications from those received will be printed in daily instalments. The best one of all, picked out by competent judges, will win for its writer a prize of a golden double eagle.
